Journal of Alloys and Compounds 320 (2001) 355–358

Journal of ALLOYS AND COMPOUNDS

www.elsevier.com/locate/jallcom

Subject Index of Volume 320

Actinides
plutonium hydride, sesquioxide and monoxide monohydride: pyrophoricity and catalysis of plutonium corrosion 58
systematics of lanthanide and actinide compound formation: remarks on the americium alloying behaviour 326
Al–Cu binary
calculated phase diagrams of aluminum alloys from binary Al–Cu to multicomponent commercial alloys 151
Al–Mg alloys
comparative study of formation and transformation of transition phases in Al–12 wt.% Mg alloy 93
Alkali
prediction of the distribution of alkali and trace elements between the condensed and gaseous phases generated during clinical waste incineration 282
Alloy development
selection of promising quaternary candidates from Mg–Mn–(Sc, Gd, Y, Zr) for development of creep-resistant magnesium alloys 296
Alloy system rhenium–aluminium
the binary system Re–Al 224
Alloy thermodynamics
systematics of lanthanide and actinide compound formation: remarks on the americium alloying behaviour 326
Alloys
enthalpy increments and enthalpies of formation of $Cd_{0.83}Ni_{0.17}$ and $Cd_{0.5}Ni_{0.5}$ intermetallic compounds 103
α-Rh_2O_3
the thermal behavior of amorphous rhodium hydrous oxide 140
Americium alloys
systematics of lanthanide and actinide compound formation: remarks on the americium alloying behaviour 326
Americium compounds
systematics of lanthanide and actinide compound formation: remarks on the americium alloying behaviour 326
Amorphous alloys
influence of the mechanical grinding on the magnetic properties of $GdMn_2$ 33
Anthracene
solubility of anthracene in the seven-component liquid system 1-propanol+2-propanol+1-butanol+2-butanol+cyclohexane+heptane+2,2,4-trimethylpentane at 298.15 K 276
Antimony
study of the ternary system germanium–antimony–tin: experimental phase diagram 218

β-Rh_2O_3
the thermal behavior of amorphous rhodium hydrous oxide 140
Binary phase diagram
thermodynamic properties and phase diagrams of the binary systems B_2O_3–Ga_2O_3, B_2O_3–Al_2O_3 and B_2O_3–In_2O_3 267

Calorimetry
enthalpy increments and enthalpies of formation of $Cd_{0.83}Ni_{0.17}$ and $Cd_{0.5}Ni_{0.5}$ intermetallic compounds 103
heat capacity and phase equilibria in rare earth alloy systems. R-rich R-Al alloys (R=La, Pr and Nd) 242
calorimetric study of maltitol: correlation between fragility and thermodynamic properties 320
CALPHAD
some guidelines for thermodynamic optimisation of phase diagrams 189
thermodynamic optimisation of the Pb–Tl binary system 228
phase equilibria and thermal analysis of Si–C–N ceramics 251
Carbon
metallochemistry of chromium in ternary systems formed by chromium with d-metals and carbon 341
Catalysis
plutonium hydride, sesquioxide and monoxide monohydride: pyrophoricity and catalysis of plutonium corrosion 58
Ce–Ag–Si system
constitution, structural chemistry and magnetism in the ternary system Ce–Ag–Si 308
Chromium
metallochemistry of chromium in ternary systems formed by chromium with d-metals and carbon 341
Clinical waste incineration
prediction of the distribution of alkali and trace elements between the condensed and gaseous phases generated during clinical waste incineration 282
Coarsening
coupled thermodynamic/kinetic analysis of diffusional transformations during laser hardening and laser welding 302
Compound
the compound energy formalism 161
Computational/experimental approach
calculated phase diagrams of aluminum alloys from binary Al–Cu to multicomponent commercial alloys 151
Computational thermodynamics
coupled thermodynamic/kinetic analysis of diffusional transformations during laser hardening and laser welding 302
Corrosion
plutonium hydride, sesquioxide and monoxide monohydride: pyrophoricity and catalysis of plutonium corrosion 58
Crystal structures
new ternary CeScSi-type RZrSb compounds (R=Y, Gd–Tm, Lu) L1
magnetic structures and magnetic phase transitions in $TbMn_{0.33}Ge_2$ 29
the binary system Re–Al 224

Diffusion couple
the diffusion couple technique in phase diagram determination 207

Elsevier Science B.V.
PII: S0925-8388(01)01371-8

Dissolution
enthalpies of dissolution of elements in liquid tin. A review. III. Elements of columns IIB, IIIA, IVA, VA and VIA of the Periodic Table 80
coupled thermodynamic/kinetic analysis of diffusional transformations during laser hardening and laser welding 302
D-metal
metallochemistry of chromium in ternary systems formed by chromium with d-metals and carbon 341
DTA
the thermal behavior of amorphous rhodium hydrous oxide 140

Elasticity
high pressure magnetic phase diagram of an antiferromagnetic Cr+0.50 at.% Re alloy single crystal 40
Electrical transport
phase relation and thermoelectric properties of the ternary lanthanum chalcogenide system La–A–S (A=Ca, Ba) 126
Electronic band structure
electronic structure of hexagonal tungsten trioxide: XPS, XES, and XAS studies 1
Electron probe microanalysis
the diffusion couple technique in phase diagram determination 207
Enthalpy
enthalpy increments and enthalpies of formation of $Cd_{0.83}Ni_{0.17}$ and $Cd_{0.5}Ni_{0.5}$ intermetallic compounds 103
Entropy
calorimetric study of maltitol: correlation between fragility and thermodynamic properties 320
Exchange interactions
exchange interactions in R–Co–B (R=Y, Sm and Gd) compounds 7

Ferromagnetic compounds
effect of aluminum substitution and rare-earth content on the structure of $R_2(Fe_{1-x}Al_x)_{17}$ (R=Tb, Dy, Ho, Er) phases 108
Ferromagnetism
ferromagnetism in the strontium deficient $La_{0.67}Sr_{0.15}\square_{0.18}MnO_3$ perovskite manganite 18
constitution, structural chemistry and magnetism in the ternary system Ce–Ag–Si 308
Fragility
calorimetric study of maltitol: correlation between fragility and thermodynamic properties 320
FT-IR
the thermal behavior of amorphous rhodium hydrous oxide 140

Ga_2O_3
thermochemistry of $GaBO_3$ and phase equilibria in the Ga_2O_3–B_2O_3 system 262
Ga_2O_3–B_2O_3 System
thermochemistry of $GaBO_3$ and phase equilibria in the Ga_2O_3–B_2O_3 system 262
Ge–Nb system
on the stability of hexagonal Ge_xNb_{10} 87
Germanium
study of the ternary system germanium–antimony–tin: experimental phase diagram 218
Glass transition
calorimetric study of maltitol: correlation between fragility and thermodynamic properties 320
Gulliver–Scheil model
thermodynamic optimisation of the Pb–Tl binary system 228

Hardness
comparative study of formation and transformation of transition phases in Al–12 wt.% Mg alloy 93
Heat capacity
calorimetric study of maltitol: correlation between fragility and thermodynamic properties 320
Heat conduction
phase relation and thermoelectric properties of the ternary lanthanum chalcogenide system La–A–S (A=Ca, Ba) 126
High pressure
pressure-induced magnetic phase transition in CrTe at approximately 7 GPa 24
high pressure magnetic phase diagram of an antiferromagnetic Cr+0.50 at.% Re alloy single crystal 40
Hydrogen absorbing materials
hydrogen storage properties of the mechanically alloyed $LaNi_5$-based materials 133

IIB, IIIA, IVA, VA and VIA elements
enthalpies of dissolution of elements in liquid tin. A review. III. Elements of columns IIB, IIIA, IVA, VA and VIA of the Periodic Table 80
Indium
thermodynamic calculation of the In–Sn–Zn ternary system 234
Interaction parameters
solubility of anthracene in the seven-component liquid system 1-propanol+2-propanol+1-butanol+2-butanol+cyclohexane+heptane+2,2,4-trimethylpentane at 298.15 K 276
Internal friction
comparative study of formation and transformation of transition phases in Al–12 wt.% Mg alloy 93

Kinetics
coupled thermodynamic/kinetic analysis of diffusional transformations during laser hardening and laser welding 302

Lanthanides
systematics of lanthanide and actinide compound formation: remarks on the americium alloying behaviour 326
Laser ablation
thermally stimulated solid state reactions in Fe–Al multilayers prepared by pulsed laser deposition 114

Magnesium
selection of promising quaternary candidates from Mg–Mn–(Sc, Gd, Y, Zr) for development of creep-resistant magnesium alloys 296
Magnetically ordered materials
exchange interactions in R–Co–B (R=Y, Sm and Gd) compounds 7
magnetic structures and magnetic phase transitions in $TbMn_{0.33}Ge_2$ 29
high pressure magnetic phase diagram of an antiferromagnetic Cr+0.50 at.% Re alloy single crystal 40
multi spin-reorientation process in $HfFe_6Ge_6$-type $HoMn_xGe_{6-x}Ga_x$ compounds (x=0.2, 0.4, 1.0) 46
Magnetic measurements
magnetic properties of Cr-intercalated $TiSe_2$ 13
pressure-induced magnetic phase transition in CrTe at approximately 7 GPa 24
influence of the mechanical grinding on the magnetic properties of $GdMn_2$ 33
high pressure magnetic phase diagram of an antiferromagnetic Cr+0.50 at.% Re alloy single crystal 40
multi spin-reorientation process in $HfFe_6Ge_6$-type $HoMn_xGe_{6-x}Ga_x$ compounds (x=0.2, 0.4, 1.0) 46
Magnetic properties
exchange interactions in R–Co–B (R=Y, Sm and Gd) compounds 7

Magneto-volume effect
pressure-induced magnetic phase transition in CrTe at approximately 7 GPa 24
Manganese
selection of promising quaternary candidates from Mg–Mn–(Sc, Gd, Y, Zr) for development of creep-resistant magnesium alloys 296
Mechanical alloying
hydrogen storage properties of the mechanically alloyed $LaNi_5$-based materials 133
Modelling
the compound energy formalism 161
some guidelines for thermodynamic optimisation of phase diagrams 189
some experiences modelling the sigma phase in the Ni–V system 199
Molar heat capacity
heat capacity and phase equilibria in rare earth alloy systems. R-rich R-Al alloys (R=La, Pr and Nd) 242
Multicomponent phase diagrams
calculated phase diagrams of aluminum alloys from binary Al–Cu to multicomponent commercial alloys 151

Nanostructured materials
hydrogen storage properties of the mechanically alloyed $LaNi_5$-based materials 133
Neutron diffraction
magnetic structures and magnetic phase transitions in $TbMn_{0.33}Ge_2$ 29
multi spin-reorientation process in $HfFe_6Ge_6$-type $HoMn_6Ge_{6-x}Ga_x$ compounds (x=0.2, 0.4, 1.0) 46
Ni–V system
some experiences modelling the sigma phase in the Ni–V system 199
Nuclear rector materials
enthalpy increments and enthalpies of formation of $Cd_{0.83}Ni_{0.17}$ and $Cd_{0.5}Ni_{0.5}$ intermetallic compounds 103

Optimisation
some guidelines for thermodynamic optimisation of phase diagrams 189
Osmium–Silicon
thermodynamic assessment of the Ru–Si and Os–Si systems 72
Oxide materials
electronic structure of hexagonal tungsten trioxide: XPS, XES, and XAS studies 1

Pb–Tl alloys
thermodynamic optimisation of the Pb–Tl binary system 228
Partial enthalpy
enthalpies of dissolution of elements in liquid tin. A review. III. Elements of columns IIB, IIIA, IVA, VA and VIA of the Periodic Table 80
Phase diagrams
thermodynamic assessment of the Ru–Si and Os–Si systems 72
on the stability of hexagonal Ge_7Nb_{10} 87
effect of aluminum substitution and rare-earth content on the structure of $R_2(Fe_{1-x}Al_x)_{17}$ (R=Tb, Dy, Ho, Er) phases 108
some guidelines for thermodynamic optimisation of phase diagrams 189
the binary system Re–Al 224
thermodynamic calculation of the In–Sn–Zn ternary system 234
selection of promising quaternary candidates from Mg–Mn–(Sc, Gd, Y, Zr) for development of creep-resistant magnesium alloys 296
metallochemistry of chromium in ternary systems formed by chromium with d-metals and carbon 341
Phase equilibria
the diffusion couple technique in phase diagram determination 207
constitution, structural chemistry and magnetism in the ternary system Ce–Ag–Si 308
Phase equilibrium
study of the ternary system germanium–antimony–tin: experimental phase diagram 218
Phase transformation
comparative study of formation and transformation of transition phases in Al–12 wt.% Mg alloy 93
Phase transition
pressure-induced magnetic phase transition in CrTe at approximately 7 GPa 24
magnetic structures and magnetic phase transitions in $TbMn_{0.33}Ge_2$ 29
Photoelectron spectroscopy
electronic structure of hexagonal tungsten trioxide: XPS, XES, and XAS studies 1
Powder metallurgy
influence of the mechanical grinding on the magnetic properties of $GdMn_2$ 33
Precipitation
comparative study of formation and transformation of transition phases in Al–12 wt.% Mg alloy 93

Rapid austenitization
coupled thermodynamic/kinetic analysis of diffusional transformations during laser hardening and laser welding 302
Rapid solidification
thermodynamic optimisation of the Pb–Tl binary system 228
Rare earth-aluminum alloys
heat capacity and phase equilibria in rare earth alloy systems. R-rich R-Al alloys (R=La, Pr and Nd) 242
Rare earth compounds
new ternary CeScSi-type RZrSb compounds (R=Y, Gd–Tm, Lu) L1
magnetic structures and magnetic phase transitions in $TbMn_{0.33}Ge_2$ 29
influence of the mechanical grinding on the magnetic properties of $GdMn_2$ 33
multi spin-reorientation process in $HfFe_6Ge_6$-type $HoMn_6Ge_{6-x}Ga_x$ compounds (x=0.2, 0.4, 1.0) 46
phase relation and thermoelectric properties of the ternary lanthanum chalcogenide system La–A–S (A=Ca, Ba) 126
hydrogen storage properties of the mechanically alloyed $LaNi_5$-based materials 133
Rare-earth iron aluminides
effect of aluminum substitution and rare-earth content on the structure of $R_2(Fe_{1-x}Al_x)_{17}$ (R=Tb, Dy, Ho, Er) phases 108
Reaction kinetics
thermally stimulated solid state reactions in Fe–Al multilayers prepared by pulsed laser deposition 114
Rh
the thermal behavior of amorphous rhodium hydrous oxide 140
RhO_2
the thermal behavior of amorphous rhodium hydrous oxide 140
Rhodium hydrous oxide
the thermal behavior of amorphous rhodium hydrous oxide 140
Ruthenium–Silicon
thermodynamic assessment of the Ru–Si and Os–Si systems 72

Scandium
selection of promising quaternary candidates from Mg–Mn–(Sc, Gd, Y, Zr) for development of creep-resistant magnesium alloys 296
Semiconductors
magnetic properties of Cr-intercalated $TiSe_2$ 13

phase relation and thermoelectric properties of the ternary lanthanum chalcogenide system La–A–S (A=Ca, Ba) 126
Si–C–N ceramics
phase equilibria and thermal analysis of Si–C–N ceramics 251
Sigma phase
some experiences modelling the sigma phase in the Ni–V system 199
Silicides
thermodynamic assessment of the Ru–Si and Os–Si systems 72
Solder
thermodynamic calculation of the In–Sn–Zn ternary system 234
Solubility
solubility of anthracene in the seven-component liquid system 1-propanol+2-propanol+1-butanol+2-butanol+cyclohexane+heptane+2,2,4-trimethylpentane at 298.15 K 276
Solution
the compound energy formalism 161
Solution model
thermodynamic properties and phase diagrams of the binary systems B_2O_3–Ga_2O_3, B_2O_3–Al_2O_3 and B_2O_3–In_2O_3 267
Spin glasses
magnetic properties of Cr-intercalated $TiSe_2$ 13
Strontium deficient perovskite manganite
ferromagnetism in the strontium deficient $La_{0.67}Sr_{0.15}\square_{0.18}MnO_3$ perovskite manganite 18
Sublattice
the compound energy formalism 161

Ternary alloy
metallochemistry of chromium in ternary systems formed by chromium with d-metals and carbon 341
Ternary phases
constitution, structural chemistry and magnetism in the ternary system Ce–Ag–Si 308
Ternary system, Thermal analysis
study of the ternary system germanium–antimony–tin: experimental phase diagram 218
TGA
the thermal behavior of amorphous rhodium hydrous oxide 140
Thermal analysis
phase equilibria and thermal analysis of Si–C–N ceramics 251
Thermodynamic
calorimetric study of maltitol: correlation between fragility and thermodynamic properties 320
Thermodynamic calculation
thermodynamic calculation of the In–Sn–Zn ternary system 234
selection of promising quaternary candidates from Mg–Mn–(Sc, Gd, Y, Zr) for development of creep-resistant magnesium alloys 296
Thermodynamic modelling
thermodynamic optimisation of the Pb–Tl binary system 228
Thermodynamic optimisation
some experiences modelling the sigma phase in the Ni–V system 199
Thermodynamic properties
thermodynamic assessment of the Ru–Si and Os–Si systems 72
heat capacity and phase equilibria in rare earth alloy systems. R-rich R-Al alloys (R=La, Pr and Nd) 242
Thermodynamics
the compound energy formalism 161
some guidelines for thermodynamic optimisation of phase diagrams 189
phase equilibria and thermal analysis of Si–C–N ceramics 251
thermochemistry of $GaBO_3$ and phase equilibria in the Ga_2O_3–B_2O_3 system 262
thermodynamic properties and phase diagrams of the binary systems B_2O_3–Ga_2O_3, B_2O_3–Al_2O_3 and B_2O_3–In_2O_3 267
Thermoelectric
phase relation and thermoelectric properties of the ternary lanthanum chalcogenide system La–A–S (A=Ca, Ba) 126
Thin films
thermally stimulated solid state reactions in Fe–Al multilayers prepared by pulsed laser deposition 114
Tin
enthalpies of dissolution of elements in liquid tin. A review. III. Elements of columns IIB, IIIA, IVA, VA and VIA of the Periodic Table 80
study of the ternary system germanium–antimony–tin: experimental phase diagram 218
thermodynamic calculation of the In–Sn–Zn ternary system 234
Trace elements
prediction of the distribution of alkali and trace elements between the condensed and gaseous phases generated during clinical waste incineration 282
Transition metal alloys
magnetic properties of Cr-intercalated $TiSe_2$ 13
Transition metal compounds
pressure-induced magnetic phase transition in CrTe at approximately 7 GPa 24
influence of the mechanical grinding on the magnetic properties of $GdMn_2$ 33
multi spin-reorientation process in $HfFe_6Ge_6$-type $HoMn_6Ge_{6-x}Ga_x$ compounds (x=0.2, 0.4, 1.0) 46

Weld thermal cycle
coupled thermodynamic/kinetic analysis of diffusional transformations during laser hardening and laser welding 302

X-ray diffraction
new ternary CeScSi-type RZrSb compounds (R=Y, Gd–Tm, Lu) LI
on the stability of hexagonal Ge_7Nb_{10} 87
thermally stimulated solid state reactions in Fe–Al multilayers prepared by pulsed laser deposition 114
the thermal behavior of amorphous rhodium hydrous oxide 140

Zinc
thermodynamic calculation of the In–Sn–Zn ternary system 234
